

Dr. Sunny Aggarwal

JOURNALS

Singh, A.K, Goyal, A, Khatri, I et al. (2016) Energy Levels, Lifetimes and Radiative Data of Ba XXVI. *Atomic and Nuclear data Tables* 109:339-351.

Goyal, A, Khatri, I, Aggarwal, S et al. (2016) Calculation of Energy Levels, Lifetimes and Radiative Data for La XXIX to Sm XXXIV. *Atomic and Nuclear data Tables* 107:406-456.

Khatri, I, Goyal, A, Aggarwal, S et al. (2016) MCDHF Calculations and Study of Plasma Parameters for Li-like Ions. *Radiation Physics and Chemistry* 123:46-54.

Goyal, A, Khatri, I, Aggarwal, S et al. (2016) Calculation of Energy Levels, Lifetimes and Radiative Data for LaXXIV to SmXXXIV. *Atomic Data and Nuclear Data Tables* 107:406-456.

Goyal, A, Khatri, I, Aggarwal, S et al. (2015) Atomic Structure Calculations and Identification of EUV and SXR Spectral Lines in SrXXX. *Journal of Quantitative Spectroscopy and Radiative Transfer* 161: 157-170.

Goyal, A, Khatri, I, Aggarwal, S et al. (2015) Collisional Excitations of Fluorine Like Tungsten using relativistic data Atomic R-Matrix Method. *Journal of Atomic, Molecular, Condensate and Nano Physics* 2 (1): 1-14

Khatri, I, Goyal, A, Aggarwal, S et al. (2015) Energy Levels and Radiative Transition Rates for Ba XLVIII. *Atomic Data and Nuclear Data Tables* 107:367-405.

Khatri, I, Goyal, A, Aggarwal, S et al. (2015) R-Matrix Calculations of Photoionization Cross Section of Ne-like Tungsten. *Canadian Journal of Physics* 93 (11): 1221-1226.

Mohan, M, Aggarwal, S, Singh, N et al. (2015) Reply to Comment on Multiconfigurational Dirac–Fock Energy Levels and Radiative Rates for Br-Like Tungsten. *Canadian Journal of Physics* 92 (6): 551- 552.

Aggarwal, S, Jha, AK, Khatri, I et al. (2015) Relativistic Atomic Data for W XLVII. *Chinese Physics B* 24 (5): 053201.

Khatri, I, Goyal, A, Aggarwal, S et al. (2015) Extreme Ultraviolet and X-ray Transition Wavelengths in Rb XXIV *Chinese Phys. B* 24(10): 103202

Goyal, A, Khatri, I, Aggarwal, S et al. (2014) Atomic Structure Calculations for Br-like Ions. *Canadian Journal of Physics* 93(5):487-495.

Aggarwal, S (2014) Atomic Structure Calculations for F-Like Tungsten. *Chinese Physics B* 23(9): 093203.

Aggarwal, S, Singh, J, Jha, A.K et al. (2014) Energy Levels and Radiative Transition Rates for GeXXXI, AsXXXII, and SeXXXIII. *Atomic Data and Nuclear Data Tables* 100 (4): 859-985.

Aggarwal, S, Verma, N, Singh, A.K et al. (2014) Multiconfigurational Dirac-Fock Energy Levels and Radiative Rates For Ni XXI. *Canadian Journal of Physics* 92 (11):1285-1296.

Aggarwal, S, Singh, A.K and Mohan, M (2014) Atomic Data for He-Like Tungsten. *Journal of Atomic, Molecular, Condensate and Nano Physics* 1(1):19-30.

Aggarwal, S, Singh, J and Mohan M (2013) Breit–Pauli Atomic Structure Calculations for Fe XI. *Atomic Data and Data Tables* 99 (6):704-732.

Mohan, M, Aggarwal, S and Singh, N (2013) Multiconfigurational Dirac Fock Atomic Structure calculations For Cl-Like Tungsten. *Canadian Journal of Physics* 92 (3): 177-183.

Singh, A.K, Aggarwal, S and Mohan, M (2013) Level Energies, Lifetimes and Radiative rates in the $4p^44d$ Configurations of Bromine-Like Ions Ph. *Physica Scripta* 88 (3): 035301.

Aggarwal, S, Singh, J and Mohan, M (2013) New Atomic data for KrXXXV useful in Fusion Plasma. *Chinese Physics B* 22(3): 033201.

Aggarwal, S, Jha, A.K and Mohan, M (2013) Multiconfigurational Dirac-Fock Energy Levels and Radiative Rates for Br-Like Tungsten. *Canadian Journal of Physics* 91(5): 394-400.

Mohan, M, Singh, J, Aggarwal, S et al. (2013) Atomic Structure Calculations Useful for Fusion and Astrophysics New Trends. *Atomic and Molecular Physics*,0(0): n.p.

Aggarwal, S, Singh, J, Jha, A.K et al. (2012) Photoionization Cross-Section of Chlorine like Iron. *Journal Of Astrophysic and Astronomy* 33(3): 291-301.

Singh, J, Aggarwal, S, Singh, A.K et al. (2012) Breit-Pauli Atomic Structure Calculations for Sulphur like Titanium. *Canadian Journal of Physics* 90(9): 833-847.

Singh J, Aggarwal S, Jha, A.K et al. (2012) Photoionization oh Al-like si using the R-Matrix Method. *Canadian Journal of Physics* 89: 1119-1126.
