

YUVASPANDANA'19

7th , 8th February 2019

Gaining skills is one of the most important things that one can do to develop his work and doing it efficiently. It is the ability to do something well. A well-developed skill can make a person master in a particular field, and it can be learned too. And skill development is the process of identification of the skills gap in youth and providing skilling training & employment benefits to them. With these thoughts in mind “YUVA SPANDANA: National Skill Development and Startup Fair” was organized by Skill Development Cell and E-Cell, SLC (University of Delhi), on 7th and 8th of February, 2019. This was a national level event fueled by some exuberant competitions and skill-based activities with the prime purpose of fostering the spirit of Skill Development and idea of Entrepreneurship. Paper presentations, Mock Stock, Business quiz, think with the box were the highlights. The Skill Expo included stalls, set up by the budding entrepreneurs to showcase their creativity. Our respected principal sir also encouraged students and participants by sharing his words of wisdom and experience. He motivated students to come up with different start up ideas as he believes that each of his student should be employable after completing the college. Participation was overwhelming as the event witnessed registration of over 300 students across the country. The event was a great success. At the end of the fair cultural events were organized. A felicitation ceremony was also there in which the winners were given exciting cash prizes.
