

Eco-club (the_last_leaf) Shyam Lal College

Report on Garden Decoration

In Collaboration with

Department of Environment, Government of India

SLC's Eco-club is of the opinion that beautification is a great way to create an atmosphere of eco-friendly life and attitude among colleges and communities together. It's a way to create and preserve both a beautiful and healthy environment where learning is enhanced. College gardening programs offer opportunities for students to get involved with nature. Such initiatives also further their interest in protecting and preserving our environment. The young youth get a closer look at natural processes and the living organisms that thrive in these environmental conditions with the help of exposure initiatives like gardening. By learning to care for a living, breathing ecosystem, students develop an understanding of nature's importance in their lives and the lives of other beings.

With an aim to promote values conducive to the beautification of the college and to spread awareness regarding trees and their importance among students, a drive was conducted by the Eco-club In collaboration with the Department of environment, Government of India on (15th Sep- 30th Oct 2016). Eco club volunteers have started conveying the eco- friendly messages through wall painting, planting trees, dead tree painting and by other means like stone gardening etc. in the campus area and around the vicinity of the college. Total 40 volunteers participated in this drive and built important life-long social skills in themselves. College gardening is a promising approach in promoting the physical, psychosocial, and intellectual development of youth while also potentially strengthening the college setting.
