

Eco-club (the_last_leaf) Shyam Lal College
Plantation drive
In collaboration with
Department of Environment, Government of NCT, Delhi

There are a plethora of benefits of planting trees, from health to environmental impact, to economics and even psychological effects. Planting and then maintaining trees help lower energy costs, reduce pollution, surroundings improve with green ambience and also increase the value of our property. Trees enhance the beauty and making your surroundings beautiful is our duty as well. So with the aim, our Eco-club team of 20 students has taken up the responsibility of growing plants and creating a green pollution free environment during the Covid-period to give back something they have taken from nature. They tried to explain the importance and maintenance of plants through awareness drives at their places in different parts of the country (Delhi, Uttar Pradesh, West Bengal, and Nagaland) during the online mode of classes from 13th Jan to 15th March 2022.

GROW TREES GROW LIFE

He who plants a tree plants a hope.

- Lucy Larcom

Without trees

- *Nothing*

With trees

- Air
- rain
- food
- home
- life
