Plantation drive on World Environment Day
In collaboration with
Department of Environment, Government of NCT, Delhi

One of the main elements of our natural surroundings is trees, which are considered the best friend of living species. But humans have started utilizing the resources insufficiently and in large quantities for all their comfort and luxury. The increase of the population has led to a decrease of the number of trees in the forest area. Therefore, there's an urgent need for the plantation of trees for reserving the resources for the future generation. Tree Plantation drives combat many environmental issues like deforestation, erosion of soil, desertification in semi-arid areas, global warming and hence enhancing the beauty and balance of the environment. Trees absorb harmful gases and emit oxygen resulting in an increase in oxygen supply. Our SAP Volunteers and Eco-club team of SLC carried a 'plantation drive' in the campus as well as at their homes from 6th March to 5th June 2022. The theme of the drive was #Only One Earth for a sustainable future. This drive was a huge success empowering students with substantial knowledge of the environment and plants and simultaneously enhancing their social skills.
