### **Seminar on Environment, Society and Culture 28<sup>th</sup> January 2020**

The social environment, social context, socio-cultural context refers to the immediate physical and social setting in which people live or in which something happens or develops. It includes the culture that the individual was educated or lives in, and the people and institutions with whom they interact. To impart this important information to our students a seminar was organized by the National Service Scheme(NSS), SLC (University of Delhi) in collaboration with Sewa Bharti for "Environment, Society & Culture" on 28th January 2020. 31 students participated in this event. The seminar was organized to enhance the interest of people in regards of Environment, Society and Culture. Issues and debates on the relationships between the environment, nature, culture and society were told to the students by the eminent speaker of the day. A large number of students gathered in the seminar room of the college to attend the same. Students found it a very interesting topic as they got to know how the three words related to each other and what its impact on a personal life is. The seminar was very informative and interactive. Students were enriched with the thoughts of the speaker after attending the seminar and they gathered a lot of information from the session.
