“Cyber Security Awareness Event by NSS”

2th February, 2024

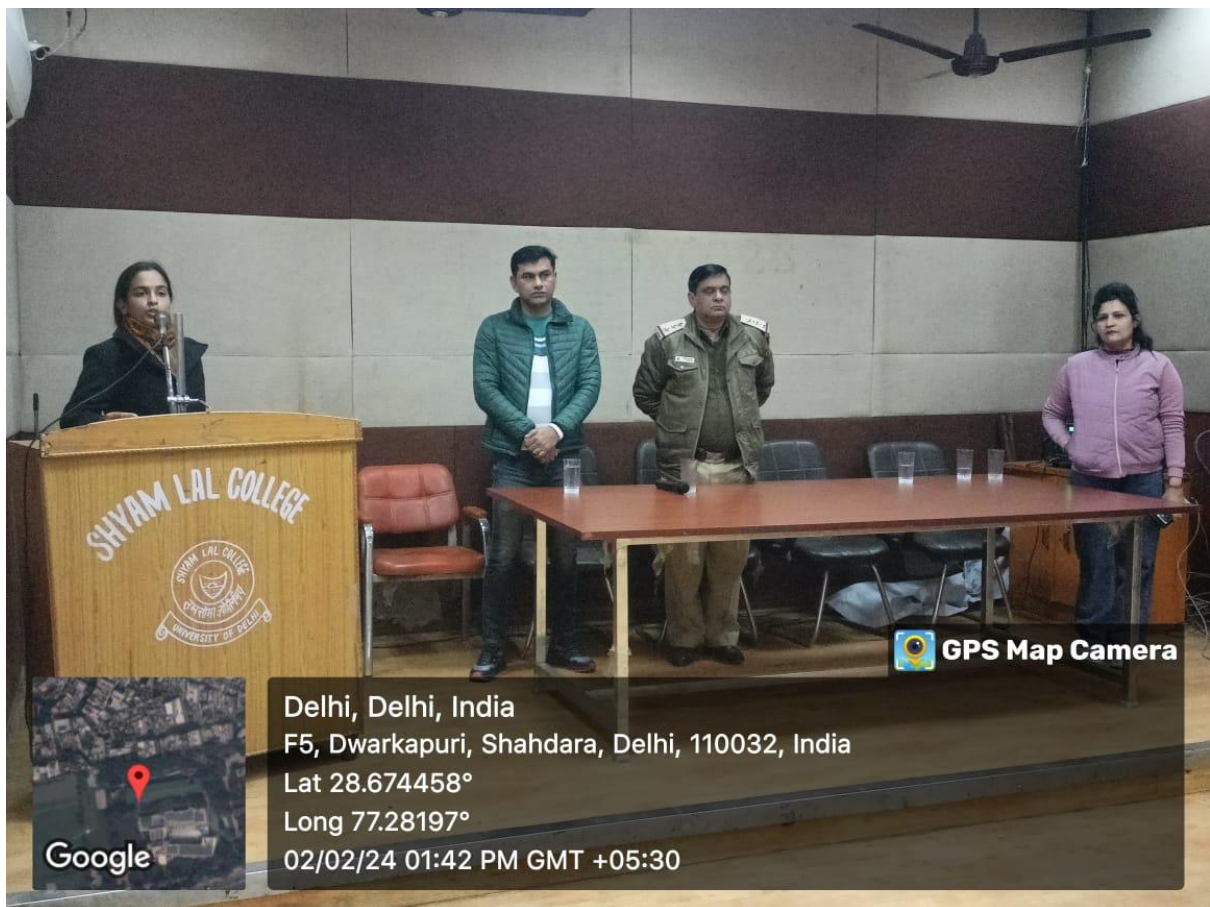

The National Service Scheme (NSS) organized a highly informative and engaging event on Cyber Security Awareness. The event was attended by 45 students and 8 faculty members. The event aimed to educate the students about the importance of cyber security in today's digital age and empower them with knowledge and skills to protect themselves online. Nowadays not only students but also a lot of educated people get trapped in cases of cybercrime.

The event featured insightful talks by cyber security experts who discussed various topics such as common cyber threats, data privacy, secure online practices, and the role of individuals in maintaining cyber hygiene.

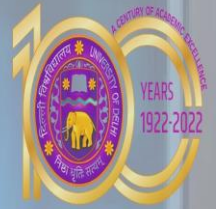

More importantly, they taught everyone how one can check whether their data is safe online or not. The cyber security experts did a practical session and there were one-to-one interactions. Students came to know about a case where how the doctor's data was misused.

Many such real-life case studies were presented to illustrate the consequences of cyberattacks and the importance of proactive cybersecurity measures.

Students had the opportunity to engage with the speakers and ask questions during dedicated Q&A sessions, allowing for a deeper understanding of key concepts and addressing specific concerns and the session came out very informative as many of the students came forward with the problems they have faced.
