Events organized by SAP Committee on water Conservation:

Water is the utmost valuable gift of nature. It is a vital component of life, without water nothing can live, thus water conservation has become a need of the hour. As charity beings at home with this motive our Swacchta team which was formed for this purpose spreads the message of saving water and starts awareness in their own campus from 6th Sep 2021. They highlighted the facts which are responsible for the increasing demand of water and also spoke beautiful quotes about its uses and importance. Some simple methods for saving water like collecting rain water for various purposes, cutting off shower time etc. were suggested through placards. Almost 20 Students Participated.

Campus survey was done by team to check leakage in campus. Our greenery Swacch team planted some water resistance plants in the campus in order to maintain the quality of ground (20 September 2021). Even we have rain water harvesting system in the campus which recharges our ground water.

Apart from this our team also survey of water sources in college campus started from (1st Sep 2021) which will be done on monthly basis

Place	No. of Taps	No. of leaking Taps	Measures Taken
New building Boys Toilet	8	NIL	
New building Girls Toilet	8	NIL	
New building PWD Toilet	2	NIL	
Old building Boys Toilet	5	NIL	
Old building Girls Toilet	5	NIL	
Old building	2	NIL	

PWD Toilet			
Staff room	Under construction		
Girls Common Room	4	NIL	
Sports Toilet Room	2	NIL	
Sports wash room	2	NIL	

In order to conserve water our college also took initiative in the premises to implement Sewage treatment plant which will get started soon. The Sewage Treatment Plant (STP) on the premises not only saves water but also helps to keep the campus healthy with clean air. The STP consists of all process units which help to minimize the chemical and biological load of domestic sewage and can be reused for gardening and irrigation purpose.
