Report on Flower show organized by University of Delhi

In collaboration with

Department of environment, Government of India

Floral exhibitions or Flower shows is an event where exotic flowers are showcased for the public to witness and embrace. It is a treat for our eyes where a manifold of flowers of color, size, texture and fragrance are presented in one place. They have a huge aesthetic appeal, and people take pictures to post it on their social media accounts. The show is usually conducted in the months of January to March, when the flowers are in full spirit to bloom. A gallery of plants belonging to different varieties for instance, petunias, lily, bougainvillea, cactus, bonsai and orchids are some to name which attracts people to spectate. Flowers had always been an integral part of our culture and traditions and the show exhibits the flower's unique power and meaning. The artistic installations of flowers provide a therapeutic experience, and have the ability to induce calmness, happiness, positivity & a range of positive emotions and feelings. The atmosphere is truly soothing and bestows a great way to rejuvenate the senses. These shows provide a great source of attraction to the tourists and promote eco-tourism. It also helps in raising awareness and aims to bring people and nature together. Thus, the affair is a great way to boost floriculture, development of horticulture, and in protecting the environment. The Annual Flower Show held on 28th February, 2018 was inaugurated by Prof. Yogesh K. Tyagi, Hon'ble Vice-Chancellor of University of Delhi. The theme of this year's flower show was "Floral Diversity of India". Our 10 Eco club volunteers participated in the flower show where they enjoyed wider range of activities with a floral theme. Even our college for the first time participated in the flower show held at University of Delhi and won the first prize in one of the categories.
