Nature's Walk is grateful for the opportunity to explore and study the rich ecosystems within the Biodiversity Park. Our Eco-Club volunteers on 25<sup>th</sup> May 23 are pleased to conduct a nature walk at the beautiful place, Sainik Farm, which is located in South Delhi and is known for its sprawling farmhouses and green spaces. They begin a nature walk from Sainik Farm to Asola Wildlife Sanctuary which is located adjacent to Sainik Farm. Our team of 10 nature enthusiasts thoroughly enjoyed exploring the park's diverse ecosystems and observing the various flora and fauna present in the area. Through this walk, students develop a sense of responsibility towards conservation and learn about sustainable practices to protect the ecosystem. Overall, these nature walks offer valuable educational experiences to students and enhance their knowledge, appreciation, and connection to the natural world.
