**Department of Environment, Government of NCT, Delhi**

Single-use plastic poses a serious threat to the environment and could be one of the major causes of our beautiful planet's destruction. Therefore, it's crucial to reduce the usage of single-use plastic by getting accustomed to eco-friendly products, rather than stopping their use entirely. To discourage the use of single-use plastic, our Eco-club and SAP team of 10 students organized an essay writing competition on April 18th, 2023, through online Google Meet, where 50 students participated and wrote wonderful essays. The main aim was to educate the students about the harmful hazards of single-use plastics and the alternatives we can use instead.

# WINNERS OF ESSAY WRITING

**1<sup>st</sup> Position**

*Nurir  
Iqbal*

**2<sup>nd</sup>**

*Divya*

**3<sup>rd</sup> Position**

*Rashmi  
Sahil*
