

Eco-club (the_last_leaf) Shyam Lal College (M)

To promote an eco-friendly and safe celebration of Holi, The Eco-Club of Shyam Lal College celebrated "Prakriti, A Natural Holi Awareness Drive" on February 27th, 2026, where 20 students created eco-friendly colour from natural ingredients. The programme began with an awareness session highlighting the harmful effects of synthetic Holi colour, which contain toxic chemicals like lead and mercury and can cause skin allergies, eye irritation, water pollution, and soil contamination. Following this, a hands-on workshop was conducted where students learn to prepare 100% chemical-free, skin-friendly gulal using natural ingredients such as marigold flowers for yellow, turmeric for deep yellow, rose and hibiscus petals for pink and red shades, beetroot powder for magenta, dried orange peel for light orange, along with corn starch and besan as the base.
